

Perlite Mix is a revolutionary perlite-based soil substrate formulated to jump-start your crop.

This patent-pending mix has been designed by Harvest Hero's team of agronomists to improve soil structure for nutrition which promotes increased flowering, enhanced terpene development, and larger overall yield.

Harvest Hero Enhanced Perlite Mix will help meet your plants' vegetative growth needs by improving soil quality and providing plant nutrients.

Backed by Science: Nutrient flow through the soil profile is amplified when O2 levels are increased due to the enhanced environment for microbial action/growth. Harvest Hero's Enhanced Perlite Mix allows for increased O2 levels in the soil.

Information regarding the contents and levels of metals in this product is available on the internet at http://www.aapfco.org/metals.html.

Harvest Hero Enhanced Perlite Mix is specially formulated to enhance your standard growing media to produce ultra-luxuriant growth, appearance, and fragrance in your potted specimen. This proprietary blend of perlite, diatomaceous earth, and plant nutrients will improve your soil quality, helping your plants get the nutrition they need, ensuring robust, vigorous growth.

Mix a ratio of 3 quarts of Harvest Hero Enhanced Perlite Mix to

10 quarts of coco peat or peat moss. Do not add fertilizers for the first 4 weeks. One 12-quart bag of Harvest Hero Enhanced Perlite Mix will supply approximately a 10-gallon container at the prescribed mix ratio above. **Root Cuttings**

• Mix a ratio of 5 quarts of Harvest Hero Enhanced Perlite Mix to

10 quarts of coco peat or peat moss. · Saturate mixture with water.

• Make hole in mixture + insert cutting, Press the mixture down around the cutting

Root stimulator may be helpful in some instances. Keep mix wet and out of direct sunlight, preferably in a shaded location. Fertilizers are not necessary for the first Seedlings

• Mix a ratio of 3 quarts of Harvest Hero Enhanced Perlite Mix to 10 quarts of coco peat or peat moss.

seed is well established, transplant to a final location.

• Place seed on top of mix and (depending upon seed species) cover with mixture. This mix may be used in trays or for seeding beds directly on the ground. When
